## HOW IT WORKS

Heated air travels through the column of moving grain via the internal heat ducts, making the drying process more efficient as well as conserving the quality of grain. The heated air then exits through the outer exhaust ducts.

## PACKAGE YOUR DRYER

*With some great handling options:*

WALINGA AIR SYSTEMS

BUCKET ELEVATORS

WRX ELECTRIC AUGERS

DOUBLE RUN CHAIN AUGERS

You can also package your NECO Grain Dryer with Galvanized Hopper Combo bins, Galvanized Flat Bottom bins, or Meridian Smoothwall bins.

# WALINGA ULTRA-VEYOR

## Harvest Heavy Weights

## SIDE-SHOOTER SPOUT

The unloading auger is turned to throw grain perpendicular to the semi-trailer, maximizing auger side reach and throw for a complete fill every time.

## COLOUR OPTIONS:

- Green
- Blue
- Red
- Black

## NEW! STABILIZER TRAX SYSTEM

New design features rubber springs and oscillating bogies to significantly reduce tank shock loads and vibration, while providing uniform ground contact over uneven terrain.

## NEW! 32 SERIES

### X-TENDED REACH DUAL AUGER GRAIN CARTS

All the advantages of a single auger front folding design with the low profile of a dual auger grain cart.

MODEL	CAPACITY*	UNLOAD TIME**	AUGER DIAMETER
<b>2032</b>	2050 BU	2.0 min.	22"
<b>2332</b>	2300 BU	2.3 min.	22"

\* Bushel capacity measured with #2 corn at 15% moisture content

\*\* Time varies with RPM and moisture content of grain

## 12 & 22 SERIES

### X-TENDED REACH J&M GRAIN CARTS

The rigid upper auger has been X-Tended for even greater outward, upward and forward reach, all while folding diagonally along the front of the cart for compact storage.

*New Leaner tank design on the 22 series. Your combine auger just gained two feet of side reach, making harvesting easier, especially with wider headers.*

**No PTO on your large tractor?**  
*J&M Carts can run hydraulically*

- Three 7,000 lb. Torsion-Flex Axles
- with Electric Brakes

*Optional  
Wireless Remote*

*Standard Remote*

### *Luxury controls are standard with all J&M Speed Tenders,*

allowing the operator to easily place the conveyor into the unload or self-fill positions and gives greater flexibility when using the conveyor as a stand alone unit to unload adjacent gravity wagons.

### *No Hassle Alignment*

Grooved end roller, V-Belt and skirting keeps the belt centered, reducing seed damage and premature wear

*Grooved End Roller  
V-Guided Belt & Skirting*

## *Wireless remote and scales makes loading the planter evenly so much easier.*

## Sukup Stir System

INCREASES AIR FLOW UP TO 33%

Loosens grain & reduces static pressure

**NEXT GENERATION  
ROCKET**

## NEXT GENERATION ROCKET

*Designed for hopper bins.*

Increases aeration fan efficiency by forcing air into the center of the bin where air is the most difficult to move.

### LASER CUT INTERNAL RING

More robust design withstands increased side loads due to irregular grain flow during unloading of the bin

## STRAIGHT DUCT

*Replace older corrugated pipe*

18" & 24" models available  
Can be made to any length

# GRAIN GUARD

*Aeration Systems*

Easy, two person

## GRAINAIR TUBE & VENT-A-LID

### POWERLESS AERATION

Maximize existing aeration systems, by increasing airflow with an aeration booster.

Remove heat from your grain using Natural Convection. Can be used in flat and hopper bottom bins, sheds, quonsets & grain piles.

- Designed to work with natural convection, the perforated GrainAir Tube allows heat and moisture to escape the bin quickly.
- Also quonset, shed and grain pile options.

*Our Vent-a-lid  
allows your bin lid  
to be fully closed  
without worry.*

## Specialty Analysis Equipment

### CARTER-DAY DOCKAGE TESTER

*Accurate and uniform tests of  
grain samples for dockage*

The Carter-Day Dockage Tester was designed to provide more consistent results than hand testing, and can use one riddle and three sieves simultaneously while aspirating at the same time.

### LAB DEHULLER HULLERMATIC

*Self-contained easy to

This compact lab sized impact dehuller, can hull oats at a rate of 5-10 BU/HR. The machine has a manual tensioner and no air. The motor is ¾ HP and wired for 110 volts.

# Colour Sorting & Processing

RNEZX 7500

RGBR 5401

## Satake Optical Colour Sorters

### RNEZX SERIES

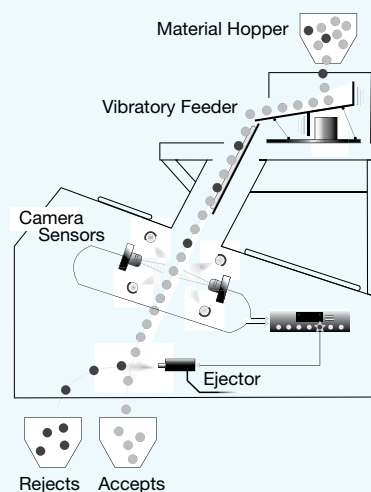

The next step in the RNEZ series. This model is upgraded with higher camera resolution, larger touch screen, option for 6 or 10 chutes, as well as shape sorting capability.

Satake's high capacity, cost-effective, **full colour** precision optical sorter series is ideal for bulk agricultural products such as wheat, lentils, peas and other small grains. The RNEZX Series sorter is able to consistently and effectively sort these product types at high capacity - up to 3.5 tons per hour per chute - for common grains. Secondary and/or tertiary resort capability is also optional if desired.

The RNEZX is powered by patent-pending Satake software assuring quick set-up and hassle-free operation. A simple user interface, similar to a smart phone or tablet with touch and flick operation, offers the operator quick adjustments to a number of settings and sensitivities.

### RGBR SERIES

Impurities such as glass, plastic and stone which are invisible or have the same colour as the material cannot be detected with only a full colour CCD camera. The RGBR series has the ability to detect and sort these impurities with a high technology NIR camera inside.

## KQ-XRN

Application of Kugler KQ-XRN on soybeans illustrating its shiny, sticky attributes that keep nitrogen available to the plant for the longterm.

## The Perfect Delivery System

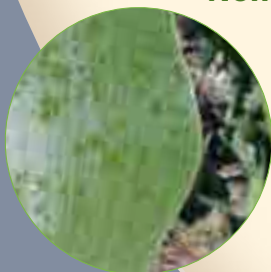

- Faster & better weed control
- Tank mix with crop protection chemicals
- Plants get a nutrient boost

### Nitrogen stays in place

KQ-XRN sticks to the leaf and stays on the leaf for up to 30 days allowing the plant to easily absorb nitrogen during critical growth stages.

### Non-Burning Formulation

Fertilizers with Kugler KQ-XRN technology are extremely safe for your plants and equipment. There is no burning and no phytotoxicity even at high application rates.

## FILTER FLOAT

This easy to use product replaces the old "chemical jug and stone system" and can be deployed in multiple water sources. Whether it is a slough, ditch, pond, or dugout, the Filter Float keeps the filter submerged without sinking to the bottom. Allowing you to draw water from sources as low as 10" deep.

*Filter floats utilize either a sand screen or super flow filter, and come in 2 sizes.*

**No need for waders when setting up your pump.**

## Ground Keeper Lawn Fertilizer

Highest percentage of nutrients per resealable bag

**NEW!**

### How it works.

#### 16% Nitrogen

your lawn's major requirement for overall growth and development.

#### 10% Phosphate

essential for healthy roots and shoots and critical for photosynthesis.

#### 3% Potassium

like a radiator, creates tolerance to climate conditions, grass hardiness.

#### 17% Sulphur

aids in maintaining dark green color and correlates with Nitrogen addition.

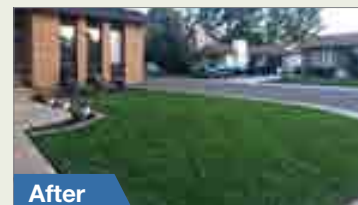

#### 3% Iron

necessary for chlorophyll reaction contributes to green coloration of lawn.

# FUEL LOCK

## MONITOR YOUR FUEL, FROM ANYWHERE

Fuel Lock is a system that locks your fuel, and allows you to view usage right from the palm of your hand. You'll know every time your fuel is accessed, and by who in real time. Owners can eliminate worry and feel confident knowing their fuel storage is secured from anywhere in the world.

**Chose the package that suits your operation best**

**Fuel Lock Personal** uses a keypad lock to protect fuel from theft.

**Fuel Lock Business** does the same thing as Personal but it also has an app that lets you control multiple PINs to who's using your fuel, and when.

**Fuel Lock Commercial** does the same thing as Business but has a level sensor so you can track the fuel level inside the tank. Set up Fuel Lock to automatically notify your fuel supplier when the level runs low.

**Fuel Lock is compatible with gasoline or diesel and either 1" or 1.5" fuel line.**
